DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Hugh Gortler on August 29, 2005.

2. The application has been amended as follows:

Replace **claim 1** with the following text:

"1. A method for collecting temperature data in a computer facility including a group of computer systems, each computer system including a computer rack, the method comprising: coupling a plurality of sensors to each computer rack at locations that allow cooling requirements of the facility to be determined; and connecting the plurality of sensors to a central system, wherein a dedicated temperature collection module and a dedicated sensor bus are provided for each group of computer systems; and wherein the sensors of each group are connected to the central system via their dedicated bus and their dedicated temperature collection module."

Claims 12-23 and 27-30 are cancelled.

Replace **claim 31** with the following text:

"31. A method for collecting temperature data in a computer facility including a plurality of computer systems, each computer system including a computer rack, the method comprising: coupling a plurality of sensors to each of the computer systems at

locations that allow cooling requirements of the facility to be determined; and connecting each of the plurality of sensors to a central system; wherein the computer systems are arranged in multiple rows of racks, wherein a dedicated temperature collection module and a dedicated sensor bus are provided for each row; wherein coupling the sensors includes coupling multiple sensors to each row of racks; and wherein connecting the sensors includes connecting each row of sensors to its dedicated module via its dedicated bus, and connecting each module to the central system."

Replace **claim 34** with the following text:

"34. The method of claim 1, wherein the dedicated buses are 1-wire buses."

Allowable Subject Matter

3. **Claims 1, 3, 8 and 31-35** are allowed.
4. The following is an examiner's statement of reasons for allowance: Egidio teaches a system and method for temperature sensing and monitoring. Egidio teach a plurality of sensors providing temperature measurements within a plurality of separate tanks, which is contrary a method comprising sensors with dedicated collection modules and dedicated buses collectively determining the cooling requirements of a computer rack systems facility. The prior art of record does not teach a plurality of sensors for each of the computer systems at locations that determine the cooling requirements of the facility to be determined and wherein the computer systems are arranged in groups of racks or multiple rows of racks, wherein a dedicated temperature collection module and a dedicated sensor bus are provided for each group or row of racks; and wherein

connecting the sensors includes connecting each row of sensors to its dedicated module via its dedicated bus, and connecting each module to the central system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
